

The voice of our first four lessons

59 unique recordings. 66 app cues. One file for every repeated line.

Recording brief

A warm young adult female voice with neutral US English pronunciation. Speak like a friendly learning companion: clear, unhurried and quietly energetic. Keep the same voice and recording setup throughout.

Read only the bold spoken words on the following pages. Filenames and delivery notes are not spoken. Keep the exact wording and avoid adding praise, letter names or extra directions. The app gives the child time to respond; do not record long waiting gaps.

Letter names and letter sounds

In the big/small and writing instructions, say the letter names: S = ess, A = ay, T = tee. In sound-building activities, the app supplies the existing phoneme recordings. For the clip Now tap, say only those two words; do not add a letter name or a sound.

Say at and sat as whole words, using the same short a vowel. Keep final sounds clear without adding an extra vowel. Review these word takes alongside the existing phoneme and pronunciation clips for consistency.

Files to deliver

One clean MP3 per numbered item, using the filename shown. Requested delivery: mono MP3 at 128 kbps, plus a mono 48 kHz / 24-bit WAV master with the same filename stem. Keep a short natural lead-in and tail without clipping consonants. Use consistent levels, with no music, reverb or sound effects.

Proposed upload folder: english/audio/. These are proposed filenames, not live audio links. Keep WAV masters in the studio archive; only the MP3 delivery files belong in this CDN folder.

What is already recorded

The 12 main teaching-video topics retain their video audio. The s/a/t phonemes and existing mouth-model videos are also reused. Paper-writing demonstrations remain silent. This brief covers current TTS instructions, words, story sentences, feedback and help, including replay and fallback prompts.

Lesson 1: S, A, T - Our First Words. Lesson 2: Explore S. Lesson 3: Explore A. Lesson 4: Explore T. The companion workbook maps every topic to the numbered recordings.

Watch, listen and take a turn

Shared prompts. Record each line once for reuse across activities.

NO	FILENAME / SPEAK EXACTLY	DELIVERY NOTE
01	shared-watch-v1.mp3 Watch.	A short, friendly invitation to watch the model.
02	shared-watch-again-v1.mp3 Watch again.	Same friendly voice; an invitation to replay.

Coverage and recording notes

The sheet follows the app as implemented on 28 September 2026. It does not add new spoken lines.

Repeated wording

Watch, Watch again, Listen, Your turn, Let's make a word together, Now tap, and Let's see what it means each have two app cue IDs. Record each phrase once. The app can reuse that file wherever the same wording is needed.

Correct answers and retries

All current spoken feedback is on the Feedback and help page. Letter matching also confirms a correct choice by replaying the existing phoneme. The app does not currently speak Wrong, Incorrect or a star count. Some praise, such as Lovely listening and Lovely tracing, appears only on screen and is not part of this recording order.

Listen-first and reading turns

The final Our First Words reading turns use Your turn to read and Read this word. Do not add at or sat to those prompts. The child can request the separate word recording for help. The app controls pauses, replay and progression.

Current meaning of at

The implemented scene is Sam is at the door. Use that sentence in this order, rather than the earlier ball-and-mat proposal. The sat prompts use Sam sat on the mat and Sam sat on the bench.

Older scripts excluded

Nine older dictionary prompts and the unused fallback activity are excluded because the current lesson route does not call them. The accompanying production manifest preserves that audit. A future activity change should update the recording order before extra lines are booked.

After recording

Check each take against the exact script, confirm every filename, and review pronunciation with the existing phonemes and video models. Upload the approved MP3s, then connect their verified URLs in the app. Shared recordings need only one upload. Nothing in this brief changes live playback.
